Part 8: Troubleshooting

Profile Not Appearing in Search

Possible Causes:

1. **Verification not complete** — Check email for verification code (spam folder)
2. **Conflicting profiles** — Duplicate profiles merged by Google; check "Suggestions" in Business Profile
3. **Address too vague** — Use real street address, not just city
4. **New profile** — Can take 1–2 weeks to appear in search

Fix:

- Re-verify via email
- Complete all profile sections (photos, hours, description)
- Add at least 3 photos
- Wait 48–72 hours before following up

Low Search Visibility

Possible Causes:

1. **Weak description** — Too generic or lacks keywords
2. **Missing schema markup** — Search engines don't recognize local business
3. **Few reviews** — Google ranks profiles with more reviews higher

Fix:

- Rewrite description with target keywords
- Implement schema markup (Part 5)
- Ask early customers to leave reviews on Google
- Create Google Posts (2–3/month)

Bad Reviews

Response Strategy:

1. Respond professionally to ALL reviews (positive and negative)
2. For 1–2 star reviews:
 - Acknowledge specific feedback
 - Offer to resolve offline ("Please DM us or email support@ipoready.io")
 - Never respond defensively
3. For positive reviews:
 - Thank customer by name
 - Mention specific feature they praised
